

We show, We share!

V-Show Technology was found in 2002 with its headquarter in Hong Kong and operation centers in Beijing, Shenzhen and Australia.

V-Show invested in a software company which mainly focuses on middleware in 2004.

V-Show invested in a media company which provides products and operation service for digital multimedia interactive platform in 2008. In the same year, V-Show established its Australian branch company and launched overseas strategy targeting on the sales of digital HD multimedia interactive products and the related customer service and support.

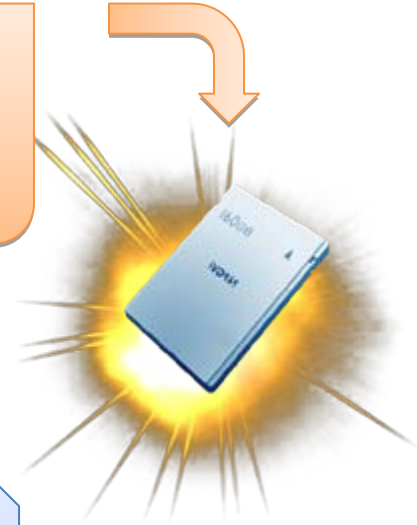

V-Show has been the technological partner of Intel, IBM and Sigma in the field of digital multimedia. It focuses on the research and development of digital products and media content operation. It provides software design and hardware development of digital interactive products, as well as the related operation service and support for major CE enterprises.

V-show has 41 engineers for R&D and 22 other employees all together at its Hong Kong HQ and branch companies in Beijing, Shenzhen and Melbourne.

- Promote integration with iVDR player to the various HD Player clients
- By cooperating with China contents owner, digital contents publish channel, Internet operating company, provide the copyright digital HD contents to the market.

TOKO Toko Trading Corporation

The basis of excellent partnership is a solid relationship where the success of customers helps their growth and development as well as ours.

We are committed to accomplishing any missions by standing on the same footing as our customers. Since ancient times, in China, there has been the custom of "entertaining visitors from a distant place at all costs", and this spirit leads to "sincerity". We know the mentality of the Japanese people through business in Japan, and in good balance have blended it with the "sincerity" of the Chinese people. In our business operations, we continue to support our partners so that they can take full advantage of their abilities, respect them and provide satisfactory services by working with them in a sincere manner to contribute to their growth and development. Only through such efforts do we believe that a truly trustworthy relationship can be achieved.

Making a good use of the wide-ranging network in china

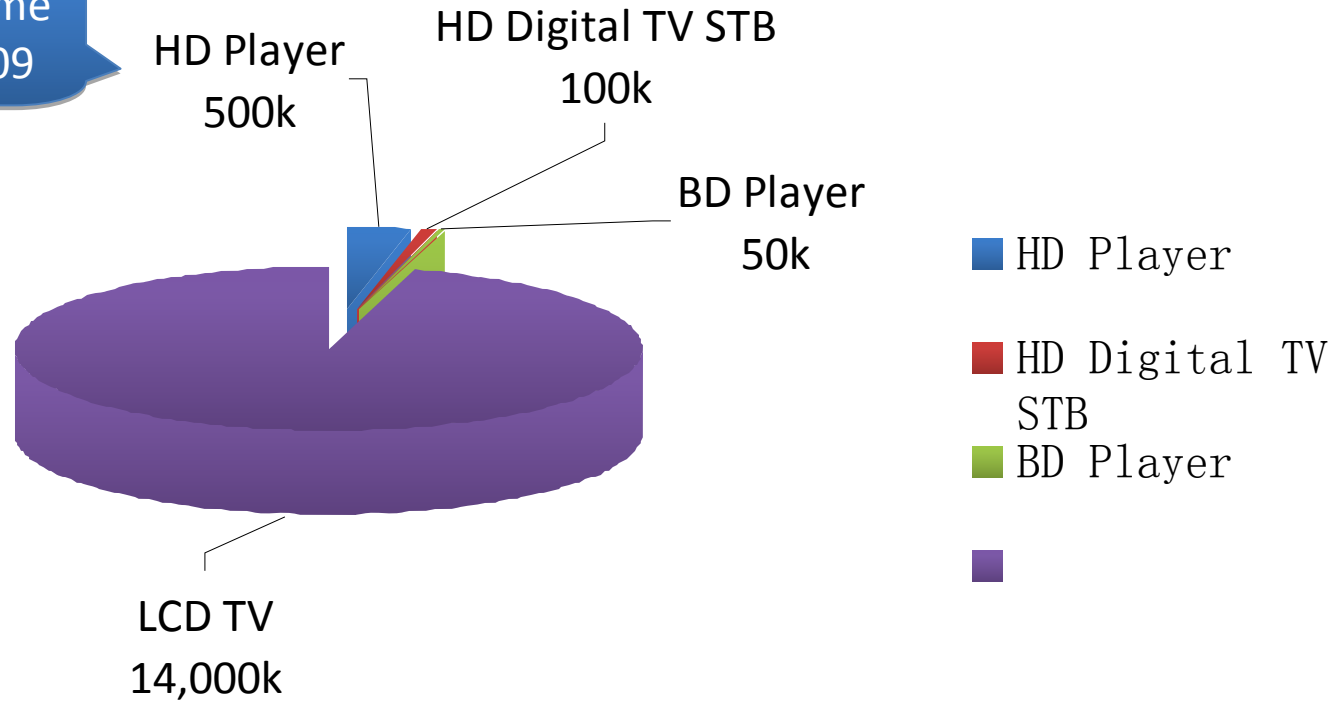

High-definition digital multimedia industry in China

The current development status of Digital multimedia industry in China

Digital Media Market (2008 in China Market)

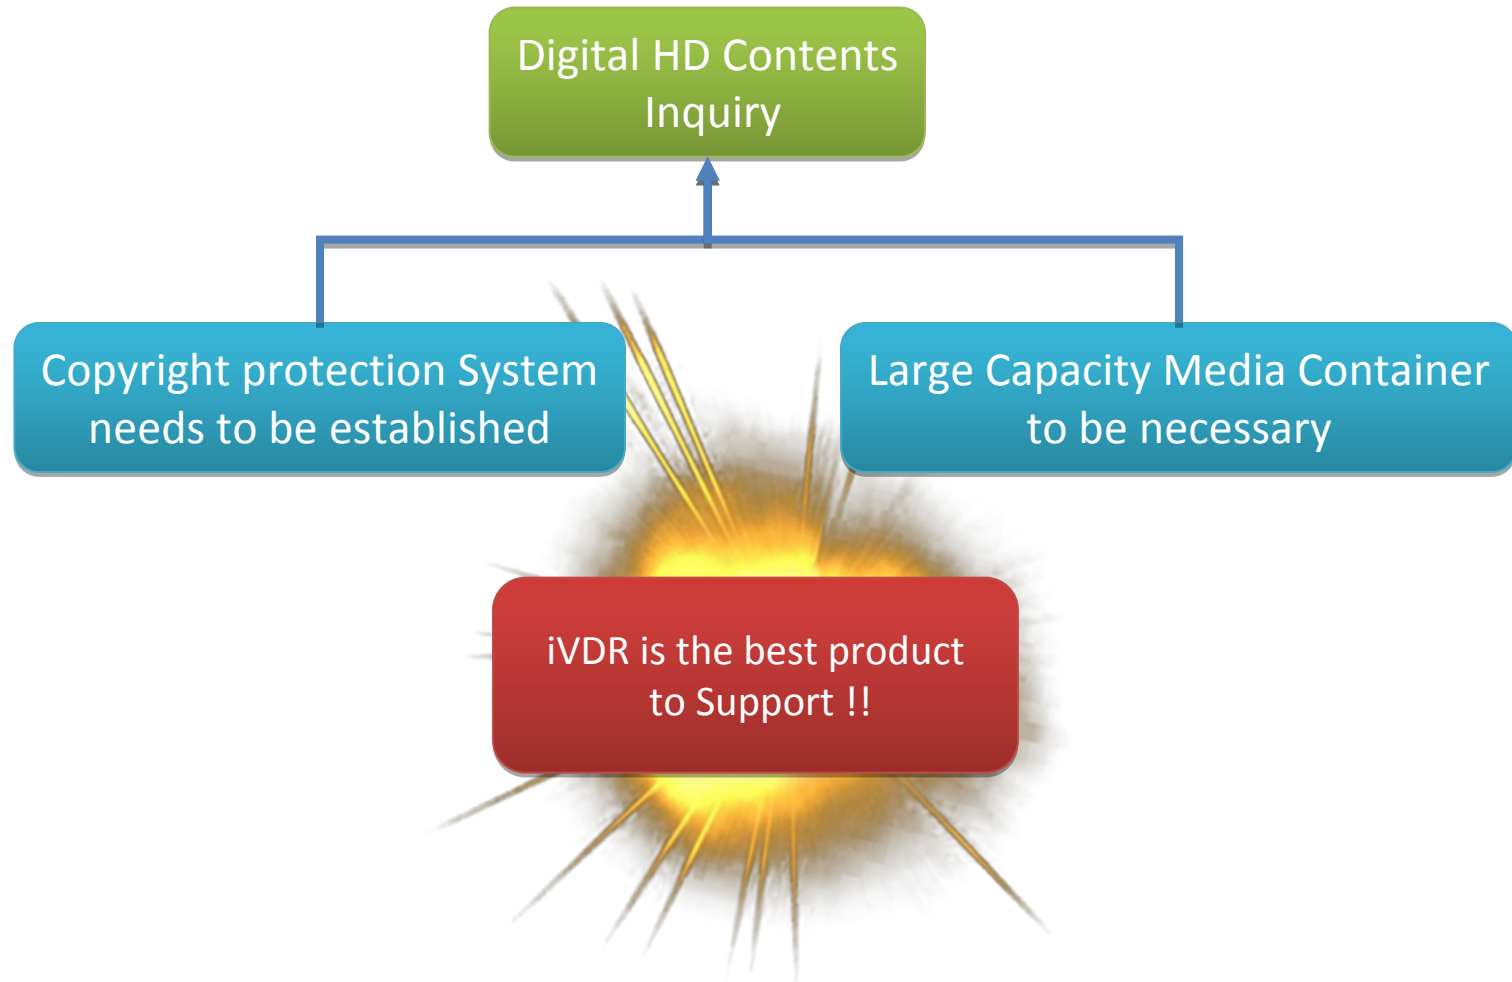

Expected become
1 million in 2009

Number of Digital TV Users : 42 million

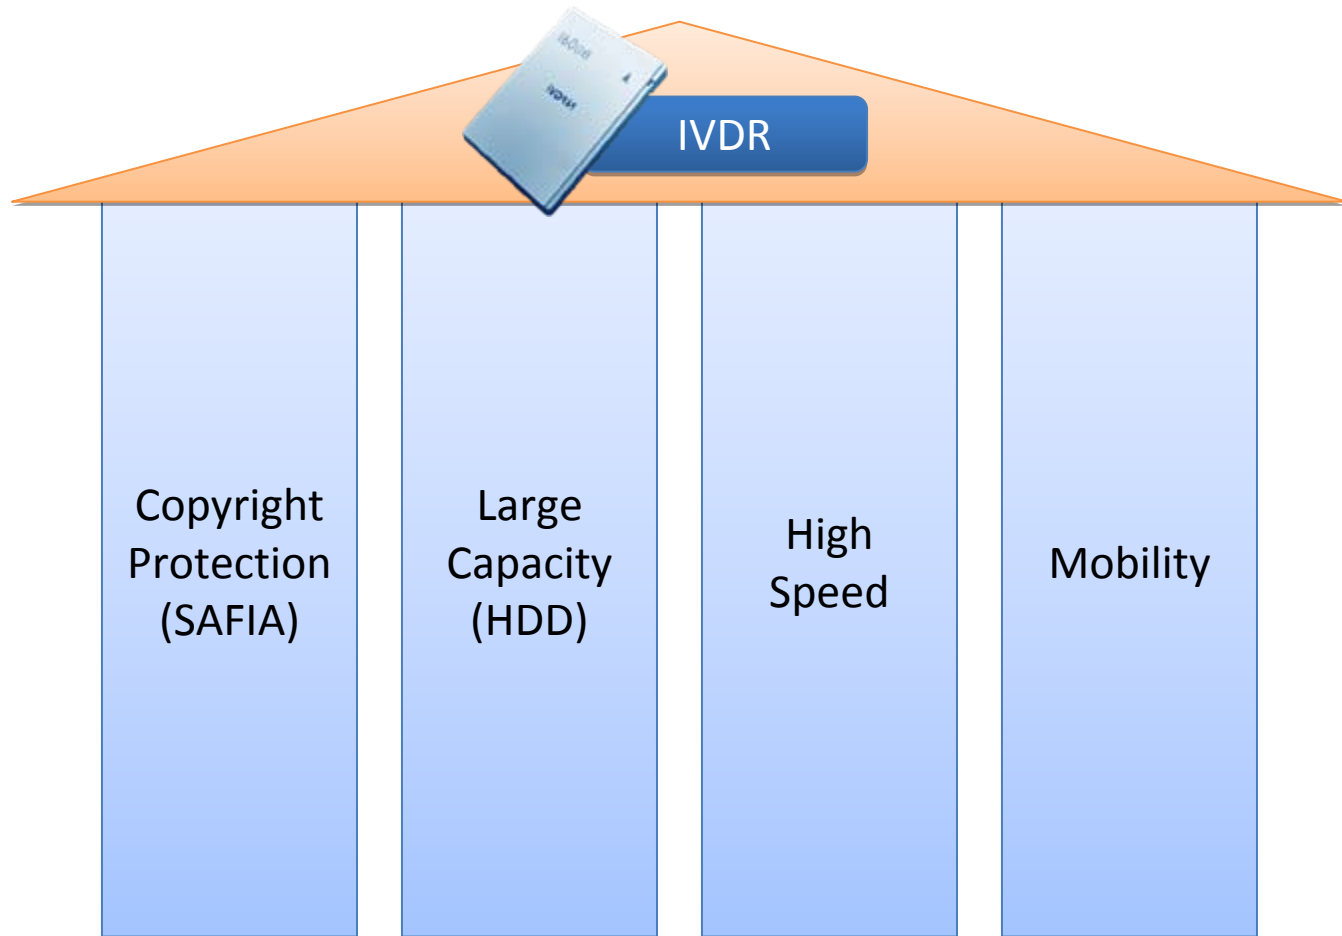

The trend of China High-Definition Digital Multimedia Market

The China has own digital content to be ready. But in order to release, China has below items to be cleared.

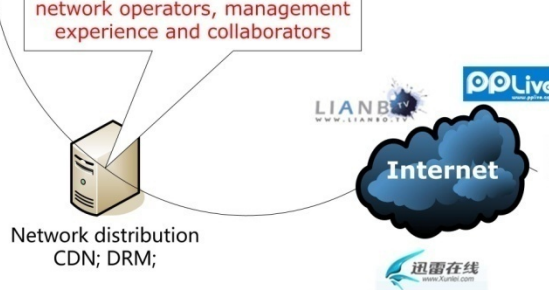

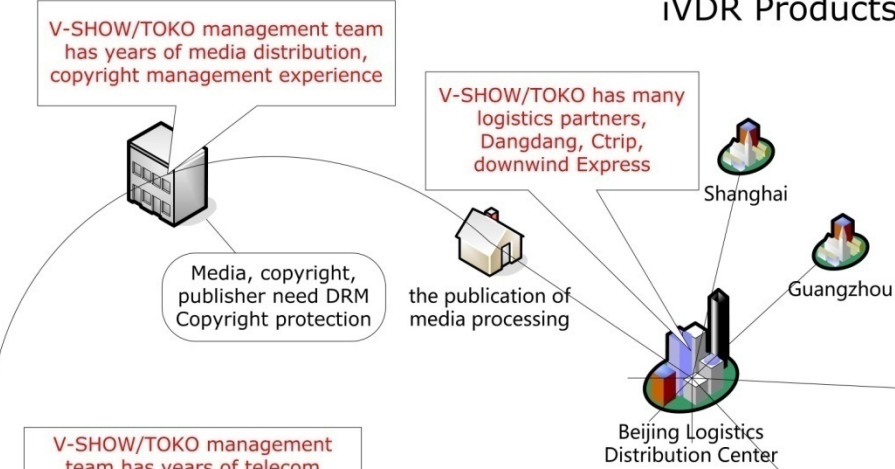

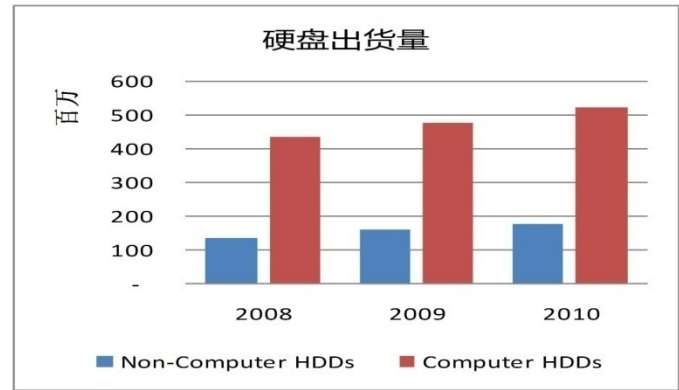

Opportunities for iVDR development in China

iVDR has the most satisfied product for recent market requirement.

The promotion of the status of iVDR Products

V-SHOW is HD network media player; DTV solution provider and designed to provide iVDR interface

Cherry I
 Sigma 8635
 Support NAS network
 2x USB2.0 interface
 Full HD 1080P output

SOC Chip manufacturer to provide V-show a direct technical support

Sigma 865x platform
Cherry III
 1x iVDR
 DTV(DMB-TH; DVB-T) PVR
 Full HD 1080P output
 Support Bit Torrent; Flash

Intel Canmore/Sigma platform
Cherry II
 Support 2x iVDR
 DTV(DMB-TH; DVB-T) PVR
 Full HD 1080P output
 Support Bit Torrent; Flash; TV
 Widget channel

The practical problems iVDR faced while developing in China

iVDR standard is the international application standard for digital multimedia industry. Although lots of partners show interesting. But there are some practical problems.

Technical Resource	Software transplant, Technical training, Product development support are insufficient.
Awareness of iVDR	Distribution and promotion of iVDR in China has not started yet.
SAFIA System	SAFIA is special for China market. Input resource, technical support are not enough.

Need more technical support and promotion activity in China !!

The business development in TV market

Manufacturer	Activity
Skyworth	Start to develop iVDR slot TV. Plant is to sell 1 million TV with iVDR in 2009 and 2010.
TCL	Start technical investigation of iVDR slot TV.
Hisense	Start pre-developing planning of iVDR slot TV.

最后請允許我在這裡向釘屋先生表達最真摯的感謝！
正是由于釘屋先生的敏銳和慧智，促成並推動了我們和
IVDR以及SIFIA組織的合作！
他是將iVDR推向中國及更廣泛市場的領軍者，請大家和我
一起以最熱烈的掌聲表達最崇高的敬意！

Extend the profound
gratitude to you

Thank you very much!
